# **Digital safe**

Protect Box provides a secure digital safe for more confidentiality.

### Mobile solution

Hosted on a USB key, Protect Box is by your side everywhere and protects your files on any device.

# **Protect Desk**

Protect Box integrates Protect Desk feature to protect all your workspaces in one click. Select as many workspaces as you want and customize the level of protection according to the sensitivity of your data.

# **INES technology**

INES is a symmetric cryptography solution based on random functions randomly distributed developed by JLMorizur Engineering. 3 security modes and 4 encryption levels. Double factor authentication and private key available.

#### Features

- 3 security modes available
- 4 levels of encryption per mode
- digital safe
- file protection
- protection of workspaces
- Suitable for any type of file
- Traceability of operations

### **Technical requirements**

- Windows 10, 7, XP
- CPU 1,6 GHz
- RAM 4 Gb
- Min resolution 1600x900

#### A complete suite

Protect Box Protect & Push Protect & Store Protect & Stream
