

The company's carbon footprint is measured annually and shared transparently.

Responsible digital technology is a collective trajectory.

Scope 1

This corresponds to greenhouse gas (GHG) emissions directly emitted by the company's activities. This includes direct greenhouse gas emissions from fossil fuels (oil, gas, coal, etc.).

Scope 2

It covers indirect GHG emissions associated with energy consumption, which occur outside the company's facilities. It encompasses indirect emissions resulting from the production of energy purchased and consumed by the organization (electricity and heating/cooling networks)

Scope 3

This includes indirect GHG emissions that are outside the direct control of the company, often encompassing upstream and downstream activities in the value chain. These emissions cover a broader range and include indirect emissions that result from the organization's activities but are outside its direct control: purchased products and services, transport and logistics, waste, etc.

3,5 tCO₂e

Conclusion

JLME observes great restraint in line with its commitments.
